## Ordering specifications (use all that apply):

- size; if there is no existing screen from which to obtain the OM of the screen, determine the size of the screen by using the conversion chart below. The daylight opening is the measurement of the visible glass;
- handing;

NOTE: Screens are standard with a color matched aluminum surround. Standard mesh is Marvin Bright View™. Determine the outside measurement of the existing screen. Find the sizes that correspond to the width and height indicated on the following chart.

**ATTENTION:** The Elevate Patio Door screen profile changed between February 2002 and May 2003.

- White screen profiles changed on 2/4/2002, along with a color change from Arctic White to Stone White. The roller bar (A213) and screen track (A214) were still used.
- On 5/6/2003 Stone White and Pebble screens changed to the new profile but use an integral roller bar instead of the old A213 roller bar and A214 screen track.
- All screen tracks can be replaced with the current head jamb screen track, A1237.
- Refer to illustrations below to identify screen type.
